Dear Dom, Over the past year, I have been reading a lot about great explorations like the Antarctic Expedition and other similar historic feats. This journey through history has given me a greater appreciation for what it truly means to guide a team effectively. Leaders in these explorations ventured into unknown territories, much like we are now with our recent acquisition. In these times of new challenges, having you at the helm is reassuring. Your foresight, adaptability, and ability to listen and chart a path forward are invaluable as we navigate these uncharted waters. Your support and guidance have also been crucial for my personal growth, for which I am deeply thankful. Congratulations on your 10th anniversary!
